42.55%

of free apps on the Google Play store could share data with Facebook*

* (Measuring third party tracker power across web and mobile: Reuben Binns, Jun Zhao, Max Van Kleek and Nigel Shadbolt 2018)

Selection criteria

Created by Eucalyp
from Noun Project

Number of downloads

Potential sensitivity of the data the app handles

Utility type apps which could give insights into user behavior

The apps we analysed* - (all between 10 and 500 million installs each)

Bible - Audio, Daily Verse, Study & Offline, Free
BMI Calculator & Weight Loss Tracker
Calorie Counter - MyFitnessPal
Candy Crush Saga
Clean Master - Antivirus, Cleaner & Booster
Dropbox
Duolingo: Learn Languages Free
Family Locator - GPS Tracker (Formally Life360)
HP ePrint
Indeed Job Search
Instant Heart Rate: HR Monitor & Pulse Checker
KAYAK Flights, Hotels & Cars
King James Bible (KJV) Free
Muslim Pro - Prayer Times, Azan, Quran & Qibla
My Talking Hank
Opera Browser
Period Tracker, My Calendar

Period Tracker Clue: Period & Ovulation Calculator
Phone Tracker By Number
Qibla Connect® Find Direction- Prayer, Azan, Quran
صلاتك Salatuk (Prayer time)
Security Master - Antivirus, VPN, AppLock, Booster
Shazam
Skater Boy
Skyscanner - Cheap Flights, Hotels and Car Rental
Speedtest by Ookla
Spotify Music
Super-Bright LED Flashlight
The Weather Channel: Local Forecast & Weather Maps
TripAdvisor Hotels Flights Restaurants Attractions
Cleaner - Boost, Clean, Space Cleaner
VK (vkontakte)
WeChat
Yelp

*Names are as they appear on the Google Play Store as of the 29th December 2018

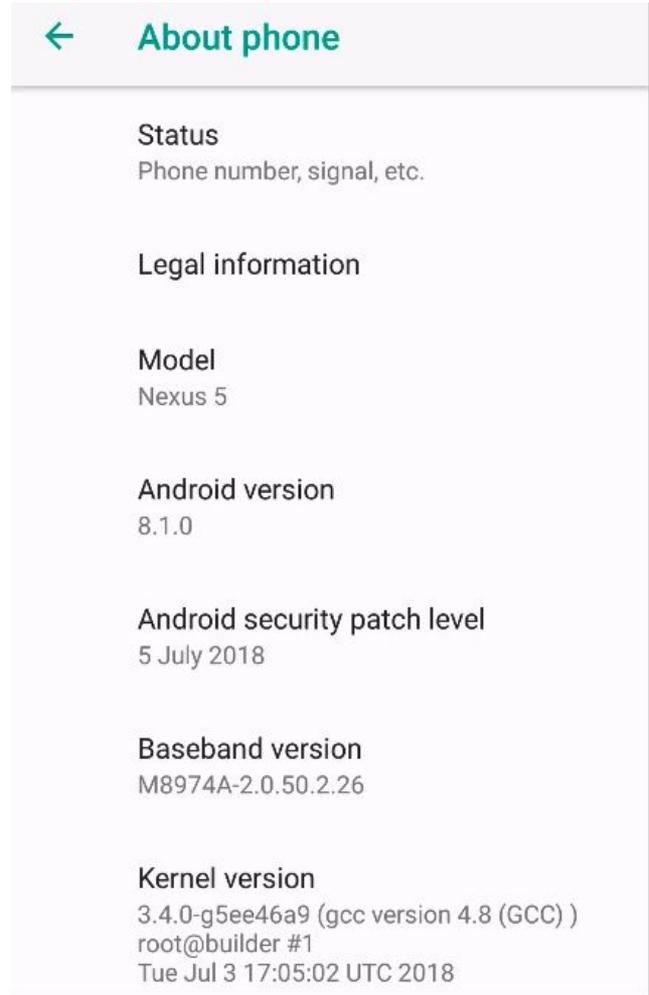

Setup for Analysis and Methodology

Nexus 5 running Android 8.1.0 (Oreo)

VirtualBox Virtual Machine running Debian Buster

MitMProxy 4.0.4

hostapd/dnsmasq/rtl8812au

Over 61% of apps tested

automatically transfer data to
Facebook the moment a user
opens the app

Kayak Analysis

The screenshot shows a web browser window with a search results page for flights from London to New York. The page is divided into two main sections: a list of flight options on the left and a detailed view of a selected flight on the right.

Flight	Price	Time	Class
British Airways BA111	£100	10h 30m	Economy
American Airlines AA1	£110	10h 30m	Economy
Delta DL1	£120	10h 30m	Economy
Virgin Atlantic VS1	£130	10h 30m	Economy
British Airways BA111	£140	10h 30m	Business
American Airlines AA1	£150	10h 30m	Business
Delta DL1	£160	10h 30m	Business
Virgin Atlantic VS1	£170	10h 30m	Business

The detailed view on the right shows the flight details for British Airways BA111, including the aircraft type (Airbus A350-900), departure time (10:00 AM), arrival time (10:30 AM), and a list of services and amenities such as meals, drinks, and baggage allowance.

The screenshot shows the Kayak mobile app login screen. The background is blue with a white car and a person standing next to it. The text reads:

Welcome to KAYAK

Sign in or register now to receive price updates, organize travel plans in one place and more

Below the illustration are three buttons for login options:

- Continue with Facebook
- Continue with Google
- Continue with email

At the bottom, there is a small disclaimer: "Don't worry, we never share anything without your permission"

**WHY DO SO MANY APPS SHARE DATA WITH FB (THE
SECOND THE APP OPENS)?**

Created by I Putu Kharismayadi
from Noun Project

Facebook places the sole responsibility on apps...

Created by H Alberto Gongora
from Noun Project

“If you use our pixels or SDKs, you further represent and warrant that you have provided robust and sufficiently prominent notice to users regarding the Customer Data collection [...] In jurisdictions that require informed consent for storing and accessing cookies or other information on an end user’s device (such as but not limited to the European Union), you must ensure, in a verifiable manner, that an end user provides the necessary consent before you use Facebook Business Tools to enable us to store and access cookies or other information on the end user’s device.” (emphasis added)

Facebook Business Tool Terms

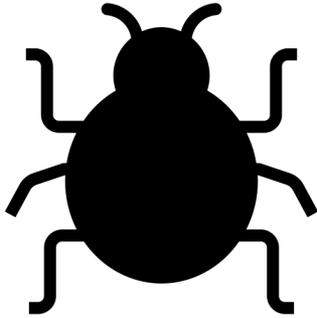

It's the default implementation of the SDK....

“When you use the Facebook SDK, some events in your app are automatically logged and collected for Facebook Analytics unless you disable automatic event logging.”

Facebook Analytics [Quickstart Guide for Android](#)

**...and developers have
been filing bug reports
about the SDK since
May...**

Created by anbilero adaleru
from Noun Project

““When integrating the Facebook login SDK into android we realized, that when initializing the SDK a request is sent to the Graph API server, which includes an App-ID and an Advertising ID. Unfortunately this isn't compliant with the GDPR Guidelines, because the users haven't yet agreed to the privacy terms when starting the app. This is also the case , when the automatic events are deactivated. At the moment we have to avoid the problem with a workaround, which however leads to crashes. [...] Please help us as soon as possible, as otherwise we are not allowed or able to use the Facebook SDK to login into our Android app.” ”
(July 24, 2018)

(Accessed: 1 December 2018).

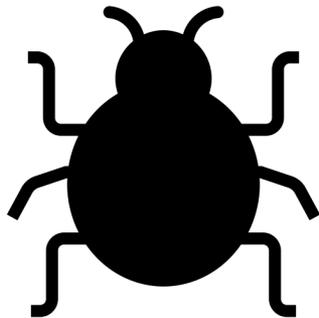

... and Facebook released
a feature that delays
automatic event data
sharing in June.

“Prior to our introduction of the “delay” option, developers had the ability to disable transmission of automatic event logging data, **except for a signal that the SDK had been initialized.** Following the June change to our SDK, we also removed the signal that the SDK was initialized for developers that disabled automatic event logging.” (emphasis added).

Facebook via email to Privacy International, 28 December 2018

...and developers
continued to file bug
reports.

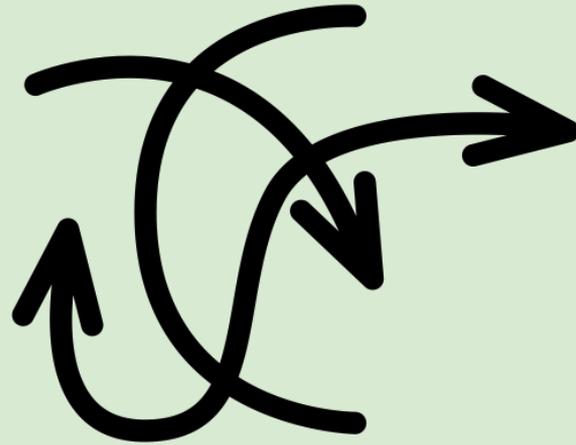

Created by anbilero adaleru
from Noun Project

“The voluntary feature that we released on June 28, 2018 for the Android SDK worked as we described at the time of launch. Following the launch, we received feedback from developers and made changes to (1) expand the information that we did not collect during the delay period, and (2) make the delay functionality available in our Unity SDK, which is separate from the Android SDK.” (emphasis added).

So you can't opt out but you can...

Block

Block graph.facebook.com using tools like AFWall+ or NetGuard

You can not install apps that use the Facebook SDK

Minimise

You could segregate your data

Reset your advertising ID and opt-out of ad-personalisation

...but why should you have to?

Replicate our research!!

Created by BomSymbols
from Noun Project

Investigating Apps interactions with Facebook on Android

Privacy International has been investigating the proliferation of data tracking, brokerage and exchange between many tech companies, both as their primary business as well as value added services.

Facebook routinely tracks users, non-users and logged-out users outside its platform through Facebook Business Tools. App developers share data with Facebook through the Facebook Software Development Kit (SDK), a set of software development tools that help developers build apps for a specific operating system. Using the free and open source software tool called "mitmproxy", an interactive HTTPS proxy, Privacy International has analyzed the data that a number of Android apps transmit to Facebook through the Facebook SDK.

On this page, you will find the full report that PI have released covering this topic and all the relevant documentation of our analysis.
